- ✓ **Productivity Monitoring**
- ✓ **Workforce Governance**
- ✓ **Data Security**
- ✓ **Risk Management**
- ✓ **Productivity Analytics**
- ✓ **Performance Management**
- ✓ **Work from Home Compliance**

## Productivity Monitoring, Workforce Governance & Analytics

A data-driven approach to transform workplace compliance, governance, productivity, and performance of your workforce working from any location.

**SAMPAT** is an award-winning workforce analytics software Product that helps organizations better understand and optimize productivity across complex work environments and empower employees to work wiser.

Hybrid work models, where some employees work from home while others return to the workplace, have become the new normal in a post-pandemic world – introducing a new set of challenges that can make it difficult to assess productivity and keep a pulse on employee well-being across distributed people, processes, and technologies.

# Transforming your data into Actionable Insights

Companies struggle to make sense of silos of Data residing all over. Amvion helps classify and categories data using AI enabled Analysis tools.

From Data Integration / classification to Advanced Analytics – wherever your Data lies, Amvion is a trustable partner.

### Seamless Data Integration

Cloud or on-prem; Collect, consolidate and processing data from any source / various platforms in real time.

### Accelerated GenAI Adoption

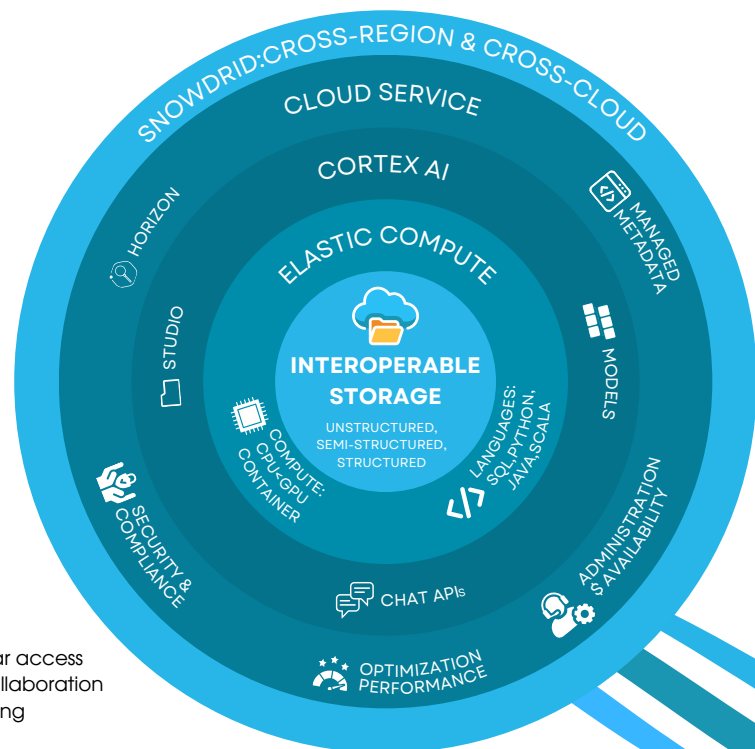

Receive in natural language, accurate, real-time answers with high text-to-SQL accuracy.

### Secure Data Sharing

With encryption and granular access controls while enhancing collaboration & data-driven decision making

### Unique Data Sets

Gain access to sophisticated apps, AI products to Connect, Collaborate and Commercialise.
